DRAGON

High productivity refractory stone static conveyor oven

GENERAL FEATURES

E 4

Flexible power supply options: natural gas/propane and electric (single or three phase) or only electric (three phases)

ADPV System: the right amount of power, always at the right time.

Dragon continuously senses your level of productivity and automatically sets the correct amount of power needed to guarantee the perfect cooking temperature. Dragon also helps to save energy when it senses it is in low productivity and automatically knows when it's time to switch into idle mode

Refractory stone cooking surface:

more crispy and long lasting results. Bake any product directly on the stone without the need to use trays or pans

840 °F (450 °C) max temperature.

Perfect for any type of dough, also high hydrations products requiring a very short cook time, like Napoli style pizza COOK GRILL -----

3-zone: possibility to set 2 different temperatures on the top, for perfect results also with products requiring different temperatures at the start and finish

Dual rotation of the belt: Dragon can easily be adjusted to allow loading and unloading according your needs

Insulated center double glass door

to easily insert a pizza slice or sandwich and to check the cooking chamber at any time

Special mesh infeed and outfeed conveyor belt, easily interchangeable and adjustable

Detachable control panel can be positioned on any side of the Dragon, left, right, top or even on the wall, according to your needs

DRAGON

Dragon is the maximum expression of Italian quality and design. The oven is made from stainless steel, including the internal structures, which guarantees long lasting beauty and strength. Ideal for semi-industrial production output, thanks to our ADPV System, it has been engineered to deliver perfect control over pizza baking parameters. It is easy to adjust and energy efficient. The result is continuous production of consistently baked pizza, with all the flavor and distinctive marking of the best hearth baked crust combined with the labor savings and speed of a refractory stone conveyor.

Made completely in stainless steel for long lasting life working 24/7	Stackable: double (gas version) or triple the production (electric version) using the same space	American made components installed: electric device, electronics and motor	Easy to clean		
Service friendly	Certifications: UL-ETL	Warranty: 5 years parts, 1 year labour *	4.0 Ready: possibility to control the ovens from remote and visualize and save all the production statistic		

*see warranty conditions details

OTHER INFORMATION

INSTALLATION SPECIFICATIONS

Installation phases require 3-5 hours.

A pizza/baking specialist will set the oven for your production needs (on request) All oven parts can fit through a standard 36" x 80" door (minimum 25" wide door) All electrical, gas and ventilation hook-ups are at the customer's responsibility and expense. Electric and gas connections must be carried out by a proper trade professional and in accordance to local rules and regulations.

As for ventilation requirements, a specialist is required.

A certified electrician is required on site during installation phases.

A certified gas service technician is required on site during installation phases.

ELECTRICAL REQUIREMENTS

PLUMBING REQUIREMENTS FOR GAS VERSION

Voltage	208 V	Gas type		Natural or Propane		
Phase	3 or 1	Gas pipe inlet	per deck	3/4 NPT		
Frequency	60 Hz	Mandatory Ga	s	3/4" regulator 20 mBar nat. gas 3/4" regulator 30 mBar LPG gas		
Current draw in 3 phase	D24E (electric) = 85 A / D24G (gas) = 36 A D32E (electric) = 105 A / D32G (gas) = 36 A	Regulator at o	ven			
Gas Supply	Natural Gas 20 mBar / 8 inches water column LPG Gas 30 mBar / 12 inches water column	Gas version: power	Dragon 24G	80,000		
Breakers in 3 phase	D24E (electric) = 100 A / D24G (gas) = 45 A D32E (electric) = 120 A / D32G (gas) = 45 A	(BTU/h)	Dragon 32G	100,000		

Electrical connections must be made directly

from the main control box or from the service output

to the oven in advance of the installation day.

•The plug, cable and receptacle are not included.

•The oven's connections must be made by an electrician on the installation day.

•Safety chains must connect the oven to the wall to prevent

it from moving. Anchoring must be done by the customer. •The length of the safety chain must prevent the flexible hoses

from straightening.

•Safety chains are not included with the oven.

•The gas hose does not come with the oven.

•The customer must purchase one and have it available on site for the installation day.
